

*"Holston Medical Group, a large multi-specialty physician group in east Tennessee, undertook an expansive building project in 1997. This involved an eighty-five thousand (85,000) square feet medical office building—state of the art in all aspects, especially in electronic technology, and patient friendly emphasis. To this regard Daneault & Associates, Inc., was selected as developer and project manager.*

*All aspects of this project have been very satisfactory and presented this medical group with the least headaches and concerns of all previous projects. We have nothing but the highest regards for Ron Daneault & Associates and will certainly utilize them for future projects.*

*Our Medical office building is the signature structure of the group and this entire area."*

Jerry L. Miller, M.D.  
Medical Director  
Holston Medical Group
